- IETF Fellowship
- See website for more information and application guide
- <http://internetsociety.org/what-we-do/leadership-programmes>

Operators and the IETF

The discussion about operator input (or lack thereof) into the IETF process is not new, but there was very little hard data to back up anecdotal evidence

ISOC created and marketed an online survey in 2014 to understand the operators' issues so that we can address the concerns and ultimately help make better standards

We are working to facilitate communications between operators and the IETF to help ensure operational realities inform standards development
